

The NAB represents terrestrial broadcasters who feel threatened and scared by the quality and massive variety offered by XM radio. I purchased XM because terrestrial stations have all become boring, formulaic, and "corporate" sounding. XM offers the entire universe of music, news, and information. XM SHOULD BE ALLOWED THE SAME FREEDOM TO BROADCAST LOCAL and REGIONAL INFORMATION. It's the free market at work. It will either succeed or fail on its own merit....exactly the same as standard broadcast stations.

Thanks.
